## Scholarship 2015 Accounting

2.00 p.m. Monday 23 November 2015  
Time allowed: Three hours  
Total marks: 40

### QUESTION BOOKLET

There are FIVE questions in this booklet. Answer ALL questions.

Write your answers in Answer Booklet 93203A.

Pull out Resource Booklet 93203R from the centre of this booklet.

Check that this booklet has pages 2–9 in the correct order and that none of these pages is blank.

**YOU MAY KEEP THIS BOOKLET AT THE END OF THE EXAMINATION.**

*Note: All FIVE questions in this booklet have equal importance, but you should allow more time for Question Five as you will need to read the resources in the resource booklet to answer that question.*

## **QUESTION ONE**

The following quote paints a dire picture of the impact of business on natural capital.

“In stark financial terms, all the evidence demonstrates a simple fact: we are failing to run the global bank that we call our planet in a competent manner. We no longer just take a dividend each year; instead, for some time, we have been digging deep into our capital reserves. And, after the near collapse of our entire financial system, we all know that such excessive risk-taking can cause immense havoc. The ultimate bank on which we all depend – the bank of natural capital – is in the red; the debt is getting ever bigger, and that is reducing Nature’s resilience and considerably impeding her ability to re-stock. It leaves us dangerously exposed.”

HRH The Prince of Wales  
Speaking at the Prince’s Accounting for Sustainability Forum  
St James’s Palace, London, December 2013

## **REQUIRED**

Explain to a New Zealand business owner what natural capital is, and whether accounting for it is an important current issue that should be considered.

## QUESTION TWO

On 1 April 2014, the company your friend works for appointed a new Chief Executive Officer (CEO) on a five-year contract. To ensure that the company employed the best person, the CEO's remuneration package included a signing-on bonus of \$500 000 on the day they started work, as well as an annual salary of \$900 000.

Your friend believes that the best way to account for the remuneration payment is as follows.

|                                                                            |    |    |                         |         |         |
|----------------------------------------------------------------------------|----|----|-------------------------|---------|---------|
| 1 April 2014                                                               | Dr |    | Remuneration in advance | 500 000 |         |
|                                                                            |    | Cr | Cash                    |         | 500 000 |
| <i>Recognising payment of CEO's signing-on bonus at date of employment</i> |    |    |                         |         |         |

At the 31 March 2015 reporting date, the payments of the salary would be accounted for as follows.

|                                                                  |    |    |                            |           |         |
|------------------------------------------------------------------|----|----|----------------------------|-----------|---------|
| 31 March 2015                                                    | Dr |    | Employment benefit expense | 1 000 000 |         |
|                                                                  |    | Cr | Remuneration in advance    |           | 100 000 |
|                                                                  |    | Cr | Cash                       |           | 900 000 |
| <i>Recognising CEO's employment benefit expense for the year</i> |    |    |                            |           |         |

## REQUIRED

Discuss whether you agree with the accounting treatment for each of the two journal entries above, using as a basis the definition and recognition criteria of the financial elements in the New Zealand equivalent to the IASB Conceptual Framework for Financial Reporting 2010 (NZ Framework).

**QUESTION THREE**

Ignore GST in this question.

*Polello Limited* is a manufacturing company with a number of different revenue streams. The following information has been extracted from the financial records for the reporting period ended 30 June 2015.

|                                                             | <b>Dr</b> | <b>Cr</b> |
|-------------------------------------------------------------|-----------|-----------|
|                                                             | \$        | \$        |
| Auditor's remuneration                                      | 19 648    |           |
| Bad debts                                                   | 7 140     |           |
| Consulting revenue                                          |           | 12 710    |
| Contributed equity 30 June 2015 (35 200 ordinary shares)    |           | 123 840   |
| Depreciation – fixtures and fittings                        | 12 100    |           |
| Depreciation – manufacturing property, plant and equipment  | 28 938    |           |
| Directors' fees                                             | 39 480    |           |
| Discount on sales                                           | 2 900     |           |
| Dividends paid                                              | 38 600    |           |
| Dividend received                                           |           | 7 980     |
| Employee benefit expense                                    | 66 738    |           |
| Interest paid on loan                                       | 28 560    |           |
| Interest received                                           |           | 4 650     |
| Loss on sale of manufacturing property, plant and equipment | 7 640     |           |
| Other expenses                                              | 16 490    |           |
| Purchases                                                   | 205 472   |           |
| Rent paid                                                   | 35 400    |           |
| Rent received                                               |           | 52 920    |
| Retained earnings – 1 July 2014                             |           | 290 930   |
| Revaluation surplus – Land 1 July 2014                      |           | 19 320    |
| Sales                                                       |           | 527 088   |
| Income tax expense                                          | 38 290    |           |
| Net assets                                                  | 492 042   |           |
|                                                             | 1 039 438 | 1 039 438 |

### Additional information

1. Included in net assets at 30 June 2015 is inventory with a closing balance of \$31 790. Inventory at 1 July 2014 amounted to \$27 670.
2. Included in "Other expenses" is a donation amounting to \$2 690 made to a not-for-profit organisation that provides funding to *Mission to Seafarers*, a charity that helps seafarers in need.
3. The directors have decided to allocate those expenses that cannot be directly attributable to a cost category on the basis of floor area. The floor area covered by *Polello Limited* has been allocated as follows:

|                | %  |
|----------------|----|
| Administration | 15 |
| Distribution   | 25 |
| Manufacturing  | 60 |

4. A debtor who owed *Polello Limited* \$5 880 on 30 June 2015 was declared bankrupt on 26 August 2015. The auditors have advised the directors that, under New Zealand equivalents to International Financial Reporting Standard, this amount should be written off at reporting date.
5. Interest of \$2 600 is still owed by *Polello Limited* on its loan at reporting date.
6. At 30 June 2015, an amount of \$6 162 was still owed to employees for work undertaken.
7. Included in net assets at 30 June 2015 is land that originally cost \$142 400. On 21 May 2015, the land was revalued by *Advena Krump*, an independent valuer. The revaluation of \$154 200 was based on the market value of the surrounding properties. No entry has been made to account for this transaction.
8. On 18 June 2015, *Polello Limited* bought back 4 800 shares at \$4.20 per share. The accountant made the following incorrect entry to account for the transaction:

|                                                    |    |    |                    |        |        |
|----------------------------------------------------|----|----|--------------------|--------|--------|
| 18 June 2015                                       | Dr |    | Contributed equity | 20 160 |        |
|                                                    |    | Cr | Cash               |        | 20 160 |
| <i>Buyback of 4 800 shares at \$4.20 per share</i> |    |    |                    |        |        |

9. The loss on the sale of equipment arose from the disposal of manufacturing equipment.
10. An analysis of the auditors' remuneration reveals that \$10 920 was for audit fees, and the balance was fees for taxation planning services.
11. The tax expense has been correctly calculated.

### REQUIRED

For the reporting period ending 30 June 2015, prepare the following for *Polello Limited*:

- the Statement of Comprehensive Income, classified by function, in a single statement format, together with accompanying notes in a format suitable for external reporting purposes
- the Statement of Changes in Equity in a format suitable for external reporting purposes. You are not required to provide supporting notes for the Statement of Changes in Equity.

**QUESTION FOUR**

Ignore GST in this question.

The following ledger accounts have been extracted from the accounting records of *Kaihoko Limited*, a company whose reporting date is 30 June 2015.

| <b>Land</b>                                                         |                    |           |           |                |
|---------------------------------------------------------------------|--------------------|-----------|-----------|----------------|
| <b>Date</b>                                                         | <b>Description</b> | <b>Dr</b> | <b>Cr</b> | <b>Balance</b> |
| 1 March 2013                                                        | Cash               | 3 062 800 |           | 3 062 800 Dr   |
| <b>Buildings</b>                                                    |                    |           |           |                |
| <b>Date</b>                                                         | <b>Description</b> | <b>Dr</b> | <b>Cr</b> | <b>Balance</b> |
| 1 March 2013                                                        | Cash               | 2 038 800 |           | 2 038 800 Dr   |
| <b>Accumulated depreciation – Buildings</b>                         |                    |           |           |                |
| <b>Date</b>                                                         | <b>Description</b> | <b>Dr</b> | <b>Cr</b> | <b>Balance</b> |
| 30 June 2013                                                        | Depreciation       |           | 67 960    | 67 960 Cr      |
| 30 June 2014                                                        | Depreciation       |           | 203 880   | 271 840 Cr     |
| <b>Manufacturing plant and equipment</b>                            |                    |           |           |                |
| <b>Date</b>                                                         | <b>Description</b> | <b>Dr</b> | <b>Cr</b> | <b>Balance</b> |

| 30 June 2013                                                        | Depreciation       |           | 465 120   | 930 240 Cr     |
| 30 June 2014                                                        | Depreciation       |           | 465 120   | 1 395 360 Cr   |

**Additional information**

- On 1 July 2014, Mrs J Alice, an independent valuer, revalued the land and buildings originally purchased on 1 March 2013. The valuation was based on the market value of surrounding properties. Mrs J Alice valued the land at \$4 355 000 and the buildings at \$2 135 500.
- On 31 August 2014, an item of manufacturing plant and equipment that had originally cost \$330 600 (accumulated depreciation at 1 July 2014 – \$160 400) was traded in on a new item of manufacturing plant and equipment that cost \$377 400. *Kaihoko Limited* received \$187 500 on the trade-in on the old manufacturing plant and equipment.
- The only entry to record the acquisition of the new item of manufacturing plant and equipment that appeared in the accounting records was:

|                                                                                                                                  |    |    |                                   |         |         |
|----------------------------------------------------------------------------------------------------------------------------------|----|----|-----------------------------------|---------|---------|
| 31 August 2014                                                                                                                   | Dr |    | Manufacturing plant and equipment | 189 900 |         |
|                                                                                                                                  |    | Cr | Cash                              |         | 189 900 |
| <i>Entry to account for the acquisition of manufacturing plant and equipment<br/>\$377 400 less trade-in amount of \$187 500</i> |    |    |                                   |         |         |

- On 30 June 2015, *Kaihoko Limited* purchased additional land and buildings at a cost of \$3 504 000. Of this amount, \$2 326 000 was allocated to the cost of the land. The acquisition of the land and buildings was financed by a long-term loan taken out with a bank. These amounts have not yet been recorded in the general ledger.
- Depreciation is calculated on the straight-line basis at the following rates:

|                                   |                       |
|-----------------------------------|-----------------------|
| Buildings                         | 10 per cent per annum |
| Manufacturing plant and equipment | 20 per cent per annum |

**REQUIRED**

Prepare ALL the journal entries and narrations necessary to account for *Kaihoko Limited's* manufacturing plant and equipment for the reporting period ending 30 June 2015.

**QUESTION FIVE**

Refer to the resource booklet to answer this question.

Since 2010, the price of *Pumpkin Patch Limited's* shares has declined steadily, in spite of reassurances from management that measures have been put in place to ensure that the situation improves.

The five-year share price movement for *Pumpkin Patch Limited* is detailed in the figure below.
